

PARTNERING FOR INFECTION PREVENTION: TEMPERATURE MANAGEMENT SOLUTIONS

Ecolab temperature management solutions can help you:

- ✓ **MAINTAIN PATIENT NORMOTHERMIA**
- ✓ **REDUCE THE RISK OF SURGICAL SITE INFECTIONS**
- ✓ **MAY REDUCE PACU TIME***

*By helping to reduce patient complications stemming from hypothermia, warm irrigation fluid may subsequently reduce PACU time leading to faster patient discharge, thus freeing up critical care beds more quickly.

COVID-19 Pandemic Message

As healthcare workers focus on the COVID-19 pandemic and managing hospital capacity, Ecolab continues to support your dedication to prevention of surgical site infections with access to our temperature management solutions.

CORETEMP™ FLUID MANAGEMENT SYSTEM

Help reduce the risk of fluid-related patient complications

The advanced CoreTemp Fluid Management System is designed to heat fluids up to three times faster than other systems, enabling its use in urgent situations, such as trauma & emergency C-Sections. CoreTemp is the first and only open-basin system to include technology that automatically and accurately tracks fluid volume during surgery.

ORS™ FLUID WARMING SOLUTIONS

Help maintain normothermia

ORS Fluid Warming Solutions help you maintain patient normothermia by providing irrigation fluid at a known and controlled temperature available directly in the sterile field during procedures where warm irrigation fluid is used.

ORS™ HUSH SLUSH SYSTEMS

Help improve patient safety, save time and minimize OR-Traffic

During procedures requiring a surgical slush machine, our Hush Slush System delivers velvet-soft slush for organ preservation, while helping to improve patient safety and save valuable nursing time. Our surgical slush machine allows for rapid cooling of tissue or organs, is placed in the sterile field and has an optional side warmer for warm irrigation fluid.

Our Fluid Warming Systems

MAY HELP REDUCE
**infections &
PACU time**

= **improved patient care**

which can
help free up
critical beds

The Ecolab team is here to support you during ordinary and extraordinary times.
